Перелік ключових слів, пов'язнаних з Цілями сталого розвитку, які рекомендується використовувати при написанні статей для наукових видань, що індексуються у БД Scopus і Web of Science

У вересні 2015 року в рамках 70-ї сесії Генеральної Асамблеї ООН у Нью-Йорку відбувся Саміт ООН зі сталого розвитку. Підсумковим документом Саміту «Перетворення нашого світу: порядок денний у сфері сталого розвитку до 2030 року» 17 Цілей Сталого Розвитку та 169 завдань.

У 2019 році Президент України своїм указом підтримав досягнення Цілей сталого розвитку та результатів їх адаптації з урахуванням специфіки розвитку України, викладених у Національній доповіді «Цілі сталого розвитку: Україна». У грудні 2020 року Кабінет Міністрів України вніс зміни до Регламенту, яким відтепер встановлено, що необхідність досягнення Цілей сталого розвитку враховується у процесі формування та реалізації державної політики України. Таким чином на державному рівні Цілі сталого розвитку закріплено у якості орієнтирів для розроблення програмних та прогнозних документів.

Пропонуємо скористатися переліком ключових слів, пов'язнаних з Цілями сталого розвитку, які можна використовувати при написанні статей для наукових видань, що індексуються у наукометричних БД Scopus і Web of Science, або для пошуку інформації за відповідними темами.

Ціль 1: Подолання бідності.

Подолання бідності в усіх її формах та всюди.
